Steve Jobs was an American entrepreneur and business magnate who co-founded Apple Computer, Inc. (now known as Apple Inc.) with Steve Wozniak. He was widely recognized as a pioneer of the personal computer revolution of the 1970s and 1980s, along with a key figure in the development of the modern technology industry.

Jobs was born in San Francisco, California, on February 24, 1955. He was adopted by Paul and Clara Jobs, a working-class couple. Jobs showed an early interest in electronics and technology. He attended the University of California, Berkeley, but dropped out after six months. In 1976, Jobs and Wozniak founded Apple Computer in Jobs's parents' garage. The company's first product was the Apple I computer, which was followed by

the Apple II in 1977. The Apple II was a huge success, and it helped to make Apple one of the most successful companies in the world.

In 1984, Jobs introduced the Macintosh, the first personal computer to feature a graphical user interface (GUI). The Macintosh was not initially a commercial success, but it eventually became one of Apple's most popular products. In 1985, Jobs was forced out of Apple by the company's board of directors. He then founded NeXT, a computer company that developed the NeXTSTEP operating system. In 1997, Apple acquired NeXT, and Jobs returned to the company as its CEO.

Under Jobs's leadership, Apple went on to develop a number of successful products, including the iMac, the iPod, the iPhone, and the iPad. Jobs also played a key role in the development of the iTunes Store and the App Store. In 2011, Jobs resigned as CEO of Apple due to health problems. He died of pancreatic cancer on October 5, 2011.

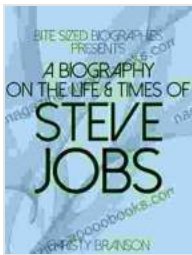

Steve Jobs was a visionary leader who changed the way we live and work. He was a brilliant innovator and a master marketer. His legacy will continue to inspire generations to come.

## **Key Takeaways**

- Steve Jobs was a pioneer of the personal computer revolution.
